

Label	Meaning
	<p>Estonian national eco-label. The eco-label is a label that confirms the environmental friendliness of a product or service. It's optional on the packaging/product and means the same as the EU organic logo. We find that the BabyCool product needs it because we use Estonian organic raw materials and the product is intended for Estonian consumers. It is on all BabyCool products except trout puree cubes. The trout is from Saaremaa, but not organic.</p>
	<p>Organic food or eco-food is labelled with the European Union organic logo, which is mandatory for all organic products. It is on all BabyCool products except trout puree cubes. The trout is from Saaremaa, but not organic.</p>
	<p>“Genuine Saaremaa Product” (<i>Saaremaa Ehtne Toode</i> in Estonian) is a label that indicates the regional origin of a product or service – the product or service is made in a clean natural environment of Saaremaa and Muhumaa, with the work and experience of local people. It is on all BabyCool products including trout puree cubes. Trout puree cubes are made from fish grown in Saaremaa!</p>
	<p>BabyCool products are marked with the label of the Estonian Allergy Association, as we have received their approval. It is on all BabyCool products except trout puree cubes. Trout puree cubes do not have the label of the Estonian Allergy Association, since they are allergens.</p>

Estonia's Best Food from a West Estonian Small Business in 2019 – this label can be found on the [pear puree cube](#) packaging. We are proud of this great recognition! Good job pear!

The [pear puree cube](#) pack has another label: THE PEOPLE 'S FAVORITE 2019 of the Estonian Best Food Competition
Thank you to all who voted!
